

## Internet Archive Blocks Access

Internet Archive is beginning to block all public access to a large group of videos. Our videos are stored on Internet Archive and many are being effected.

We urge users to download their favorite videos (see the FAQ on our '[About](#)' page) and Internet Archive to once again make these videos available to the public ([info@archive.org](mailto:info@archive.org)).

We are working to self-host our most popular videos and expect site downtime, but will not permanently close: "Together we show what they hide"
